

Missouri State Interoperability Executive Committee Meeting Announcement

Missouri State Interoperability Executive Committee meeting set for Thursday, April 27 2006 beginning at 1000 AM with anticipated adjournment at 1 PM.

The Missouri State Interoperability Executive Committee (SIEC) will hold a meeting on Thursday, April 27, 2006 beginning at 10am at the **Missouri State Troopers Association, 1729 E Elm Street, Jefferson City, MO 65101**. The SIEC, a body of state and local public safety communications personnel representing Missouri's user community since being created and empowered by the Missouri Department of Public Safety to enhance communications interoperability between public safety entities in Missouri, will discuss ongoing topics that have an immediate impact on public safety and critical infrastructure communications. These topics include:

10 AM Welcome and Brief Overview of SIEC Stephen Devine, SIEC Chairperson

1010 AM Updates on the status of the SEMA VHF/UHF mobile and portable grant initiative as well as a discussion on Missouri Homeland Security regional interoperable initiatives (Master Site Controller) in the Kansas City and St Louis areas. The Committee will discuss the recent grant process and how it served to heighten the Missouri's public safety community's awareness of the FCC's 2013 public safety narrow-banding requirement.

1030 AM The SIEC will determine the Missouri operational and technical requirements and the statewide template development for the thirty-two (32) I/O Channels designated for interoperability by the FCC in the 700 MHz band. Managing FCC designated 700 MHz Interoperability spectrum is the primary function of the SIEC, and, since 700 MHz deployment has begun in Missouri, many issues regarding 700 MHz interoperability need to be addressed at this meeting.

1 PM Adjournment

**Should there be any questions regarding this meeting, please contact Missouri SIEC
Chairperson Stephen Devine at 573-526-6105**
